The set of all three hangers. A set of coat hangers created from parts of a bike. A constructive and unique way to hang up your clothes. And you can make them all yourself. If it was to go into production the hangers would be made from the whole of the bike, utilizing all the parts possible. For this set, 3 have been made. One from part of the wheel, one from the handlebars and the third from the main frame. The metal from the wheel and frame is complimented with wood finishing. Individual products in the range include 'HandleBar', 'Wheel' and 'Frame'.

## Materials & Equipment List

Materials  
Material specifications across all three hangers;  
Disused BMX bike frame and wheel; sourced from local Beeston skip  
Iroko Wood; can be sourced from SL Hardwoods Ltd ([www.slhardwoods.co.uk](http://www.slhardwoods.co.uk))  
Ply wood; can also be sourced from SL Hardwoods Ltd  
Nuts and bolts; taken from the bike  
Metal Hooks; Made from spokes from the wheels  
Beeswax; sourced from local DIY shops  
Processes used  
Cutting; Hacksaw- can be bought from local DIY shops (it is possible that all cutting is done this way by hand, but to speed up the process, Band saw can be used)  
Band saw cutting
